

FCC-80 BLOCK CLEANER & WHITENER

This concentrated cleaner & brightener is formulated with the power of chlorine for grease cutting and bleaching. Designed for use in a wide variety of applications and dilutions for economical and versatile performance.

This powerful liquid concentrate is designed for use in the food industry to clean and brighten problem areas, and contains chlorine bleach for the most effective cleaning performance on heavy grease and blood stains. Adjust the dilution to meet the cleaning requirements of each application to get the job done as quickly and economically as possible.

Directions: dilute this concentrate with warm or cold water. Use 1 part fcc-80 to 4 parts water for most block whitening or cleaning. Dilution ratios may be adjusted for deeper stains or lighter stains, or desired speed of whitening. Be sure to rinse with potable water after use.

This product is authorized by the U.S.D.A. as a general cleaning agent on all surfaces.
